

Professional Power DR® CHIPPER

Rid your property of unsightly brush piles, fallen branches, and dead or diseased trees up to 4-1/2" in diameter!

SOLID STEEL, 1-3/16" FLYWHEEL SPINDLE

is mounted with heavy-duty ball bearings at both ends of the shaft and has a grease fitting for easy lubrication.

11" WIDE HOPPER OPENING

handles limbed and forked pieces, reducing the amount of trimming necessary to prevent hang-ups.

14" DIAMETER CHIPPER FLYWHEEL

is made of 3/4" solid steel, providing the mass and momentum for devouring even knotty, hardwood trees and branches. (The 10 HP Model has an 18-pound, 12" diameter flywheel made of 1/2" steel.)

CHIPPER CHAMBER

is made of hand-welded, 7-gauge steel. (10 HP model uses 10-gauge steel.)

CENTRIFUGAL CLUTCH

with belt drive system provides positive transfer of power and protects the engine from damage by allowing slippage if the knife hits a solid object.

EXTRA SHARP CHIPPER KNIFE

is made of heat-treated tool steel and can be removed for sharpening.

18 HP Top-Discharging Model

The DR's top-discharging feature enables you to shoot chips where you want them — into a cart or trailer, into a pickup truck, or even into the woods. The result is you spend little or no time collecting or dispersing the chips you create. Handles branches up to 4-1/2" thick. Road towable to 45 mph. Comes with ball coupler, directional and brake lights and safety chains.

Engine: 18 HP Briggs & Stratton, VANGUARD V-TWIN, Overhead Valve, 4-cycle Electric-Starting engine: cast-iron cylinder sleeves, fuel pump, oil pump with spin-on oil filter, electronic ignition, mechanical governor, dual element air filter, 56-ounce oil capacity, 9-quart fuel capacity. **Engine Warranty:** 2 years in residential use; 2 years in commercial use.

PNEUMATIC TIRES

on a steel axle make for easy transport.

HEAVY-DUTY FRAME

is made of square 2" tubular steel. The frame on the 10 HP and 12 HP model is made of 7-gauge steel.

WHICH DR® Model is Right for You?

10 HP OHV Manual-Starting

An excellent performer and a GREAT VALUE! Features a 12" diameter, 1/2" thick, 18-pound flywheel for chipping branches up to 3-1/2" in diameter. Tow by hand or with a lawn tractor.

Engine: 10 HP Intek OHV BRIGGS & STRATTON 4-cycle engine. Manual-Starting. **Engine Warranty:** 2 years residential use; 90 days commercial use.

12 HP Electric-Starting

A step up in power over our 10 HP model, the 12 HP DR® CHIPPER features a 14"-diameter, 3/4"-steel, 33-pound flywheel, and a 4-1/2" chipping capacity — just like our largest model. Tow by hand or with a lawn tractor.

Engine: 12 HP Briggs & Stratton INTEK® Overhead Valve 4-cycle Electric-Starting engine: 342 cc displacement, mechanical governor, electronic ignition, 4-qt. fuel capacity. **Engine Warranty:** 2 years residential use; 1 year residential use.

16 HP or 18 HP V-Twin Electric-Starting

With a choice of powerful V-Twin engines, this chipper quickly devours branches up to 4-1/2" in diameter up to 50% faster than our 12 HP model! Road-Towable up to 45 mph, with a heavy-duty, 2" tubular-steel mainframe, 16" pneumatic tires, a 2" ball coupler with safety chains, tow beam stand and a light kit, with directional signals and brake lights installed.

Engine: Your choice of 16 or 18 HP Briggs & Stratton, VANGUARD V-TWIN, Overhead Valve, 4-cycle Electric-Starting engine: cast-iron cylinder sleeves, fuel pump, oil pump with spin-on oil filter, electronic ignition, mechanical governor, dual element air filter, 56-ounce oil capacity, 9-quart fuel capacity. 2 year engine warranty for residential use; 2 years in commercial use.

Road Towable!

3-Point Hitch, Tractor-Mount

Mounted on the back of your tractor, the 3-Point Hitch DR® CHIPPER uses your tractor's power to quickly clear your property of unsightly brush piles. Utilizes a 14"-diameter, 3/4"-steel, 33-pound flywheel. Chipper hopper is 14 gauge welded steel, with 8" x 11" opening. Belt drive from PTO is spring-loaded and self-adjusting. Steel skid-type stands support the unit.

Tractor Requirements: Up to 45 HP maximum. Fits all category 0 and 1 three-point hitches. Uses a quick-attach, self-adjusting PTO shaft for 1-3/8" 6-spline PTO with clockwise rotation.

DR® CHIPPER Accessories for EXTRA Versatility and Convenience

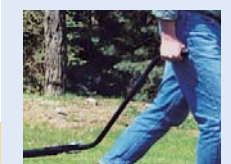

Protective Cover

For all models except Top-Discharging.

Shelter your DR® CHIPPER with this heavy-duty nylon cover. Made of tough, woven 250 denier Dacron and coated with an acrylic, waterproof finish. Rot and mildew-resistant. Drawstring bottom with barrel clamps keeps the cover securely in place.

Tow Beam Stand

for 10 and 12 HP models (included with 16 and 18 HP models). If you won't be using your CHIPPER while it is attached to a riding mower or lawn tractor, this Tow Beam Stand quickly and easily attaches to support the hitch end of the unit...to hold it level and steady during operation. Made of 1/2" thick steel. Can be installed or removed in seconds with a single hitch pin.

Tow Handle

for 10 and 12 HP models! Although these models come equipped with pin

hitches for attaching to a riding mower or garden tractor, these chippers are also easy-rolling enough to move around by hand. The tow handle makes moving them by hand even easier, by providing a convenient, extended handle, so you do not have to bend over to tow them. Made of 1" tubular steel; 32" long. Attaches easily to the tongue of the tow beam. All hardware included.
