

The DR® CHAMP™ ROTOTILLER

So easy to handle you can guide it with ONE HAND!

With a powerful 6.5 HP Briggs & Stratton Intek Overhead Valve engine, the DR® CHAMP™ has the deep tilling and sod-busting capability of much larger, heavier tillers. This hard-working machine has all the power most gardeners will ever need...in a compact size that's easy to handle. With a 16" tilling width, the CHAMP™ fits easily between planting rows to cultivate weeds.

GEAR-DRIVEN TRANSMISSION

is rugged and durable for years of use!

ENGINE

6.5 HP Briggs & Stratton Intek Overhead Valve, aluminum bore, 20-ounce oil capacity, Magnatron® ignition, paper air filter. Engine Warranty: 2 yrs. consumer use; 1 yr. commercial use.

SPECIFICATIONS:

- Tilling Width: 16"
- Tilling Depth: 1"–8"
- Weight: 195 lbs.
- Operator controls are easy to engage with either hand...just let go, and the tiller stops moving forward and the tines stop turning

- Speeds: 1 forward/1 reverse
- Shaft drive, cast-iron and bronze gear transmission is the most proven tiller design for long life
- Power-driven, tractor-style wheels drive the machine forward, while you simply guide it with either hand

POWER COMPOST

leaves, spent crops, and other organic matter directly into your soil for better results every year.

POWER-DRIVEN WHEELS

drive the tiller while you guide it with a single hand!

POWER REVERSE

provides great maneuverability—especially in tight quarters.

INSTANT DEPTH REGULATOR

allows you to just skim the surface to uproot weeds, or prepare seedbeds up to 8" deep!

TINES IN THE REAR

mean NO WHEELMARKS (or footprints) in your freshly tilled soil!

BOLO TINES

both till the soil and power-compost vegetation.
