

**COMMERCIAL HYDRAULIC PUMPS AND WHEEL MOTORS** enable you to smoothly change the direction and speed of each drive wheel with easy hand controls, resulting in turn-on-a-dime maneuverability.

**ELECTRIC CLUTCH** The electric clutch enables you to engage and disengage the blade instantly. Requires no maintenance and is far more durable than idler-belt clutches.

**PRO-60™ SPINDLES WITH 5-YEAR RESIDENTIAL WARRANTY** Blade spindles have a split-aluminum housing for serviceability, zerk valves for lubrication, and tapered roller bearings to provide 4 to 5 times the life of spindles on residential-grade z-turn mowers.

**FULLY WELDED DECK WITH ANTI-SCALP WHEELS** The 3-blade 10-gauge steel deck is precision welded and includes a 1/2" steel reinforcement strip to ensure it will deliver years of performance. Anti-scalping rollers in the front and the back of the deck help produce a beautifully level, clean cut.

**HOUR/RPM/MAINTENANCE METER** monitors the engine hours, RPM, and oil and filter change schedules.

**FOOT-OPERATED CUTTING HEIGHT ADJUSTMENT** is activated from the operator's position, to easily react to differences in grass height, and thickness.

**23" DIAMETER REAR TURF TIRES** deliver better traction and a smoother ride on uneven terrain.

**PROTECTED BY A 2-YEAR ENGINE AND MACHINE WARRANTY** against defects in materials and workmanship (in residential or commercial use).

## VERSA-PRO™: COMMERCIAL SPEED AND VERSATILITY FOR YOUR YARD!

**The mower that does what the other Zs can't!** With up to 22 HP, a 52"-wide cut, and a top speed of 13 mph, the DR® VERSA-PRO™ Z-MOWER makes fast work of big lawns, and leaves behind a beautifully clean cut. Responsive, two-lever hydrostatic controls enable you to maneuver quickly around obstacles and get in and out of irregular spaces with ease. Best of all, if you have slopes or pond edges that are unsafe for a rider, the VERSA-PRO™ Z-MOWER converts to a walk-behind mower in seconds and goes just about anywhere. It's the only z-steer mower that can mow all the areas of your big lawn!

### 19.5 HP MODEL

• 48" cutting width • Electric-Starting

**19.5 HP BRIGGS & STRATTON ENGINE:** Extended Life Series OHV engine with Anti-Vibration System, cast-iron cylinder sleeve, full pressure lube and spin-on oil filter.

### 22 HP MODEL

• 52" cutting width • Electric-Starting

**22 HP BRIGGS & STRATTON ENGINE:** Extended Life Series OHV V-twin cylinder engine with Anti-Vibration System, cast-iron cylinder sleeves, full pressure lube and spin-on oil filter.

### BOTH MODELS FEATURE WALK-BEHIND VERSATILITY.

Anything a ride-on mower can do, the VERSA-PRO™ Z-MOWER can do better. That's because it can become a walk-behind mower instantly, no tools required. Just release a lever and the controls swing back, so you can steer and mow while walking. Full control is at your fingertips. So, if your mowing takes you into highly landscaped areas, call on the VERSA-PRO™ Z-MOWER. It leaves all other riding mowers way behind.

### BUILT WITH PRIDE

All DR VERSA-PRO™ Z-MOWERS are proudly made in the USA.
