

New Models!

DR® PREMIER RAPIDFIRE™ KINETIC LOG SPLITTERS

**WORLD'S FASTEST
LOG SPLITTER!**

With a 3-second cycle time, the new RapidFire™ Log Splitters are the fastest, most productive log splitters you can find.

- **New Electric-Powered Model!** Split indoors or out with the convenience of clean, electric power!
- **It's Yard Towable!** With the optional Pin Hitch you can tow the Premier around your property and split wood wherever it is most convenient for you.
- **Easy to Maneuver.** With built-in handle and easy-rolling 11" tires, the Premier model is easy to maneuver around your property. The optional Yard Towing Kit makes it towable behind any vehicle with a pin hitch.
- **Auto Retraction.** With ordinary splitters you are tethered to the machine so you can return the ram to its starting position. The RapidFire retracts automatically, leaving your hands free to handle the wood.
- **Durable Features.** The optional work table is forged of reinforced steel, and the hardshell belt and flywheel housing provides bulletproof protection for the "guts" of the RapidFire.
