

BIG LEAF-COLLECTING PERFORMANCE FOR NOT-SO-BIG YARDS.

With gale-force suction, the powerful Walk-Behind DR® LEAF and LAWN VACUUM cleans your lawn of leaves, grass clippings, pine cones, pine needles, most nuts and more...while you move forward at a comfortable walking speed.

In highly landscaped areas, the Walk-Behind LEAF and LAWN VACUUM gets up close to flower beds and shrubs without risk of damaging valuable plants. You can quickly collect debris along foundations, stone walls and fences. Or make quick turns around trees. And at just 28" wide you can even squeeze through garden gates, for complete property cleanup. So throw away your rake. And enjoy the speed and ease of vacuum cleaning.

MULTIPLE SPEEDS

Self-propelled models feature three speeds (1.2 to 2.2 mph), so you can select the pace that's right for you and the terrain.

4-TO-1 VOLUME REDUCTION

As leaves and debris are collected they are also compressed. That means you can reduce four bushels of debris into the area of just one.

LIFETIME SOLID STEEL IMPELLER

is similar to the impeller used on our Tow-Behind models. Spins at 3,250 rpm to create a 123 mph suction force. Guaranteed against damage or defects for as long as you own the LEAF and LAWN VACUUM!

DUST-TAMER™ TOP SHIELD is a solid polyethylene cover that directs vacuumed debris and dust downward into the bag...and away from the operator's face.

SEMI-PNEUMATIC TIRES are puncture proof, for years of trouble-free performance.

26"-WIDE ACU-VAC™ INTAKE

is controlled from the operator's position. Open it wide for collecting thick layers of leaves or just a little, for collecting hard-to-pick-up pine needles and nuts. Close the intake completely and suction is directed to the optional on-board Vacuum Hose Attachment.

INSTANT HEIGHT ADJUSTMENT

Fine-tune the vacuum nozzle height with one crank. Raise it higher when vacuuming deep leaves and in long grass. Lower it for creating a powerful suction when vacuuming hard surfaces such as driveways, patios, and garage floors.

LARGE-DIAMETER WHEELS

Large, 14"-diameter wheels make for easy rolling and handling. Self-Propelled models feature treaded rear drive wheels for extra traction.

PROTECTED BY A 2-YEAR WARRANTY

against defects in materials and workmanship in residential use; 90 days commercial use.

ELECTRIC-STARTING SELF-PROPELLED MODEL

BUILT WITH PRIDE
All DR® LEAF and LAWN VACUUMS are proudly made in the USA.

6.50 PUSH MODEL

Our Push model is ideal for cleaning smaller yards that are flat and without hills.

When the terrain is level, this model rolls easily on big 14" diameter wheels...even with a full load. The manual-starting Quantum engine is plenty powerful and has a compression-release feature, so it starts with just an easy pull.

- Manual- Starting

BRIGGS & STRATTON 650 SERIES ENGINE (6.50 ft-lbs torque):

Overhead valve, cast-iron cylinder sleeve, 2 year engine warranty for residential use; 90 days for commercial use.

6.50 SELF-PROPELLED MODELS

For hilly property, large yards and uneven terrain, our Self-Propelled models can't be beat.

Just select your speed, squeeze the lever and go. All you need to do is steer, while walking along at a pace that suits you and the terrain. Getting started is easy, too. Choose the easy-pull manual-start model or flip a switch to power-up the electric-starting model.

- Manual- or Electric-Starting

BRIGGS & STRATTON 650 SERIES ENGINE (6.50 ft-lbs torque):

Overhead valve, cast-iron cylinder sleeve, 2 year engine warranty for residential use; 90 days for commercial use.
